

### Demonstration Script

<b>Session</b>	Technical	<b>Estimated Time</b>	1 hour
	Client		
<b>Purpose</b>	To establish the implications of adopting the package from a client-side perspective.		
<b>Attendees</b>	Technical Team		
<b>Preparation</b>	Please set up in advance:		
	<ul style="list-style-type: none"> <li>• Prepare to demonstrate PC-based client software installation</li> </ul>		
	<b>Activity</b>		
	Present on what operating systems your PC-based client is compatible with. Provide details of specific software requirements (e.g. patches, service packs).		
	Present, for each of the supported operating systems above, on the minimum <u>and</u> recommended hardware specifications (including Processor, hard disk space, RAM, screen resolution and colour depth).		
	Present any specific network protocol requirements to operate the package.		
	Demonstrate the installation procedure, by installing your client software on a standard Northumbria NT4 workstation.		
	Present on any mechanisms that exist to ease client software upgrade work.		
	Present and discuss the various alternative client software delivery methods available to Northumbria. Make recommendations on how Northumbria could reduce the need for visits to client machines.		
	Present on the client printing model. Detail any constraints regarding printing to windows accessible printers.		
	Present any specific web client requirements. List all approved web browsers. List any additional software (including plug-ins) required for full use of the web-based client.		
	Any other related information that supports your proposal.
